In this guide, you'll find helpful information for estimating your storage needs. Please note that these guidelines are estimations, and your actual storage needs may vary depending on the ability to stack items vertically within the unit.

The majority of our household storage units have 10ft tall ceilings, but heights do vary from 10ft+, depending on the unit. Please note that the garage door opening is 8' x 8' on all of our units except the 5' x 10' (4' x 8' garage door opening), and all items must be able to fit within that opening.

We also offer commercial storage units up to 1,200 SQ FT, as well as Boat, RV, Trailer, and Vehicle Parking on site!

Need help deciding which unit is the right size for you, or have additional questions regarding unit specifications?
